Summer Internship Project Report

Submitted To

DataRitz Technologies

Duration 6 weeks

Session 2019-20

Submitted By

Team-App Demons

**1.Umang Agrawal (Lead)
2018BCS1041**

2.Shruti Gupta 2018BCS1056

3.Muskan Gupta 2018BCS1175

4.Shivank Sharma 2018BCS1009

**Under the guidance of
DR. B.P. Sharma**

ABES ENGINEERING COLLEGE, GHAZIABAD

 Estd. 2000		
<p style="text-align: center;"> AFFILIATED TO DR. A.P.J. ABDUL KALAM TECHNICAL UNIVERSITY, U.P., LUCKNOW (Formerly UPTU) </p>		

CERTIFICATE

This is to certify that Project Report entitled ' **EXPERT GUIDE** ' which is submitted by **Team App Demons** in partial fulfillment of the requirement for the summer internship of degree B. Tech. in Department of **Computer Science and Engineering** of ABES Engineering College, AKTU is a record of the candidates own work carried out by them under my supervision. The matter embodied in this thesis is original and has not been submitted for the award of any other degree.

SUPERVISOR-

DATE- 3 July 2020

ACKNOWLEDGEMENT

It gives us a great sense of pleasure to present the report of the B. Tech summer internship Project undertaken during B. Tech. **Second** Year. We owe special debt of gratitude to Professor B.P. Sharma, DataRitz Technologies for his constant support and guidance throughout the course of our work. His sincerity, thoroughness and perseverance has been a constant source of inspiration for us. It is only his cognizant efforts that our endeavors have seen light of the day.

We also take the opportunity to acknowledge the contribution of Head, Department of DataRitz Technologies for his full support and assistance during the development of the project. We also do not like to miss the opportunity to acknowledge the contribution of all faculty members of the DataRitz Technologies for their kind assistance and cooperation during the development of our project. Last but not the least, we acknowledge our friends for their contribution in the completion of the project.

Name- Team App Demons
Date- 3 july 2020

 CHAPTER 4	
4.1 Conclusion	41
4.2 References	41

Chapter 1

1.1 INTRODUCTION

We are making this app so that a student can easily select their college. As we know that various students evaluate their career through college and they find themselves either compromising on their dreams or being unable to decide between competing options. Instead of a clearly path, students are at best an independent who will survive and thrive only with a constantly evolving skill-set. So basically this app helps them to find right career profiles. In this app, there are two entities :- college/admin and student/user.

An admin or college sign-in to expert guide account and after signing in they filled their college details such as seats availability, fees details, cut-off percentage, infrastructure etc. There is an option for student sign-in also where they filled their details for admission such as the course which they want to do, exam name which they opted for, score as well as their rank of the exam which they appeared, and their category.

When the student filled their details, they will get the details of the colleges which they can apply for or take admission. They will get those particular colleges that are matched on their details or merit-basis of various competitive exams they have given. Finally, the content closes out that it will simply help students to choose right college.

Problem Introduction:

As we know, students after passing their intermediate, struggle for admission in various colleges. Why not to make their struggle easier. This project focuses on creating a platform which will in a way connect students to colleges just like Ola connects the driver and the traveller. That's just an example..;)

1.1.1 Project Objective:

Here, on the app, student will need to enter all the details on a form

input provided. It will include only relevant information such as Exam type, Course, Score/Rank based on which he/she will be provided a list of colleges. Student can also use filters on basis of fee structure or location around which he/she is looking for the colleges. Student based on his/her choice can also further select a college and get relevant information about it from our database collected already by the college. College will remain connected to students through Expert's Guide. Also, the college needs to regularly update all details regarding the admission such as Availability of seats, fee structure, cutoff rank/score and all other important information.

1.1.2 Scope of the Project:

This project will only display the information entered by the external user. User can search for the college he wants to take admission in and the colleges can get the students to fill their vacant seats.

1.1.3 Introduction to Technologies/Language:

React Native is a JavaScript framework used for developing a real, **native** mobile application for iOS and Android. It uses only JavaScript to build a mobile application. It is like **React**, which uses **native** component rather than using web components as building blocks.

Software Genre: JavaScript library

Developer: Facebook

1.1.4 Library / In-built function / package / modules used in your project:

We have used various dependencies and modules in our project. We used expo for creating the app pages ,We have used 'figma' for creating the prototypes for the app. We have used "android studio"s" virtual device to see the navigation of our app.

1.1.5 Hardware Requirement:

S.NO	SERVER NAME	OPERATING SYSTEM	CONFIGURATION
1.	N/A	Windows 10	8 GB RAM AND 64 BIT PROCESSOR

1.1.6 Software Requirement:

ITEM	VERSION	DESCRIPTION
Notepad++	7.7.1	Notepad++ is an integrated development (IDE) which contains a base workspace and an extensible plug in system for customising the environment. Notepad++ is used for developing java applications.
Vs code	latest	Visual Studio Code is a free source-code editor made by Microsoft for Windows , Linux and macOS . ^[7] Features include support for debugging , syntax highlighting , intelligent code completion , snippets , code refactoring , and embedded Git .

1.1.7 Integrated Development Tool(IDE)

Many improvements ,new plugins and features,more stable and major code completion enhancement,notepad version 7.7.1,Visual code are used for creating the project.

2.1.5 Front Page demo

Type to enter a caption.

2.1.6 Prototyping (Student)

2.1.7 Form Input For Students/College

EXPERT GUIDE	
- SELECT YOUR career	
Course Name	Number of seats vacant
<input type="text"/>	<input type="text"/>
Exam Name	Fee Structure
<input type="text"/>	<input type="text"/>
Score	Last date to register
<input type="text"/>	<input type="text"/>
Rank	Registration link
<input type="text"/>	<input type="text"/>
<input type="button" value="Search"/>	<input type="button" value="Submit"/>

CHAPTER 3 - CODE AND RESULTS

3.1 CODE AND SNAPSHOTS

3.1.1 Welcome Page

```
import React from 'react';
import { StyleSheet, Text, View, TextInput, TouchableOpacity, Image
Background, Image } from 'react-native';

export default class App extends React.Component {

  render(){
    return (
      <ImageBackground source={require('./
bgg.PNG')} style={styles.container}>
        <Text style={styles.logo}> EXPERT GUIDE </Text>
        <Text style={styles.heading}> -CHOOSE YOUR CAREER</Text>
        <Image source={require('./
student.png')} style={{width: 100, height: 100}} />
        <TouchableOpacity style={styles.loginBtn}>
          <Text style={styles.loginText}>Student</Text>
        </TouchableOpacity>
        <Image source={require('./
college.png')} style={{width: 100, height: 100}} />
        <TouchableOpacity style={styles.loginBtn}>
          <Text style={styles.loginText}>College</Text>
        </TouchableOpacity>
      </ImageBackground>
    );
  }
}

const styles = StyleSheet.create({
  container: {
    flex: 1,
    alignItems: 'center',
    justifyContent: 'center',

  },
  logo:{
    fontWeight:"bold",
```

```

        fontSize:40,
        color:"#000302",
        textShadowColor: '#000',
        textShadowOffset: { width: 0.5, height: 0.5 },
        textShadowRadius: 3,
        marginBottom:20
    },
    heading:{
        fontWeight:"bold",
        fontSize:20,
        color:"black",
        marginTop:0,
        justifyContent:'center',
        textAlign:'center',      textShadowColor: '#000',
        textShadowOffset: { width: 0.5, height: 0.5 },
        textShadowRadius: 3,
        marginBottom:20
    },
    loginBtn:{
        width:"80%",
        backgroundColor:"#3cb371",
        borderRadius:25,
        height:50,
        alignItems:"center",
        justifyContent:"center",
        textShadowColor: '#000',
        textShadowOffset: { width: 0.5, height: 0.5 },
        textShadowRadius: 2,
        marginTop:20,
        marginBottom:10,
    },
});

```
